3. Select Set Up Without Another Device.

4. Choose a Wi-Fi Network.

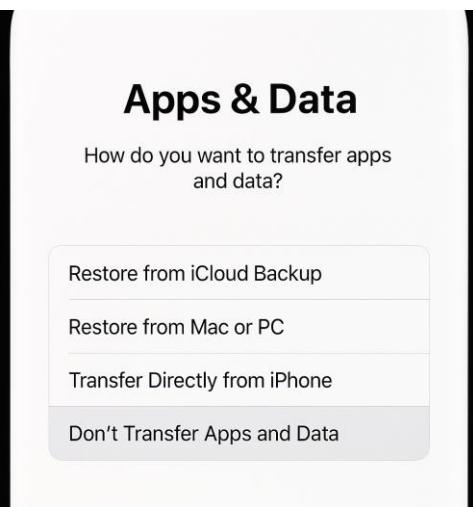

If there is a prompt to Finish Cellular Setup - an eSIM from Verizon is ready to be setup on this iPhone, follow the steps to activate the device's eSIM and cellular service.

The "It may take a few minutes to activate your iPhone" screen will pass automatically.

New Device Set Up

5. Select **Don't Transfer Apps and Data**.

6. Click **Next**.

This Remote Management step may take several minutes depending on your network connection.

Please call the Service Desk if this screen does not say "Enbridge Inc. will automatically configure your iPhone"

7. Enter your Enbridge ID and password.

8. Authenticate your login on the secondary device, either WinAuth on an Enbridge laptop or Microsoft Authenticator on personal mobile device. Or, contact the Service Desk for support.

11. Swipe up to get started on the Welcome to iPhone screen.

12. Wait for the Company Portal to install. This may take up to 15 minutes.

13. Click **Sign in**.

If you need any assistance in Signing in to company portal please reference the following video: [Set up Company Portal](#)

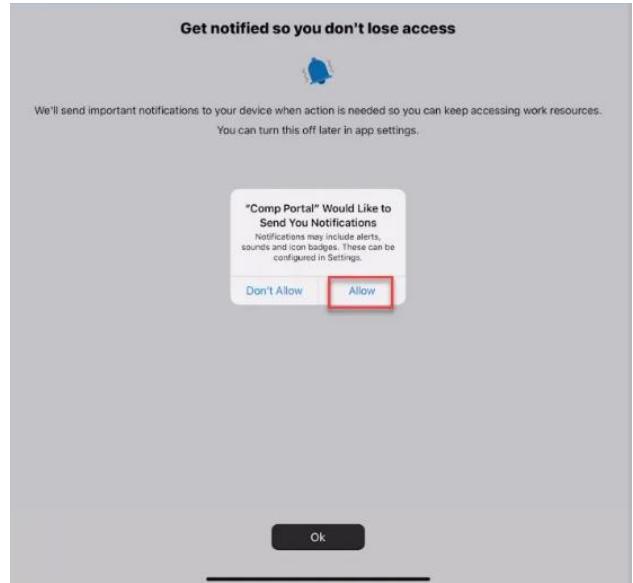

14. Enter your Enbridge ID and password.

New Device Set Up

15. Authenticate your login.

16. Click Allow then Ok.

17. Tap **Begin** then **Continue** to Set up Enbridge Access.

The Check Device Settings process may take several minutes.

Click **Done**.

New Device Set Up

18. Tap Only While Using the App.

Allow "Comp Portal" to access your location?

Your company will use your location to help protect company resources on this device. Your company will not be able to see or share your location information.

If you only allow access to your location while you are using the app, some features may not work while the Company Portal is in the background.
